The HEDIS Productivity and Quality Report is a system of reporting that captures both productivity and quality of measures by combining a variety of third-party reports including timekeeping, VoIP, and client productivity and overread data. The top portion of the report represents client targets for Abstraction, Research, Overread, Pursuit, and Secondary Pursuit. Using these targets we parse the data comparing VoIP, timekeeping, and client database data to provide you the client with data as to goals, activity, and quality. Demo available upon request.
